

salesFLEX for BusinessVision 7.2 now available!

Gemini Logic is pleased to announce the release of its latest version of salesFLEX for BusinessVision. This release includes a number of exciting new additions, further enhancing your BusinessVision reporting capabilities, including:

- New “Cross-Tab” report type adds thousands of new report combinations. (A Cross-Tab is a row-and-column report, similar in design to a spreadsheet)
- New “Interactive Graph Drill-Down” report type allows you to view data graphically, with the ability to drill-down on the graphs for additional detail
- New Report and Filter Fields:
 - Territory Name
 - Salesperson Name
 - Current Product Code from Inventory File
 - Current Sales Department from Inventory File
- New Export Options
 - Allow export of data only to Excel (includes amended formatting issues when exporting to Excel)
 - Export to Word
 - Export to HTML
- The ability to append relevant Names, Descriptions, Numbers or Codes to “Report By” and “Then By” columns. (For example, if the “Report By” selected is “Part Number” you can append the “Part Description” if desired, such “*CD-204 – Compact Disk Player*”).
- BusinessVision 7.2 and Vista compatible
