

d-Analyzer™

The Analytical Tool for your Business

Explore and Analyze your critical Business Data with d-Analyzer

In order to compete in today's increasingly tough global environment, your business needs a competitive advantage. d-Analyzer is the differentiator that gives you that edge.

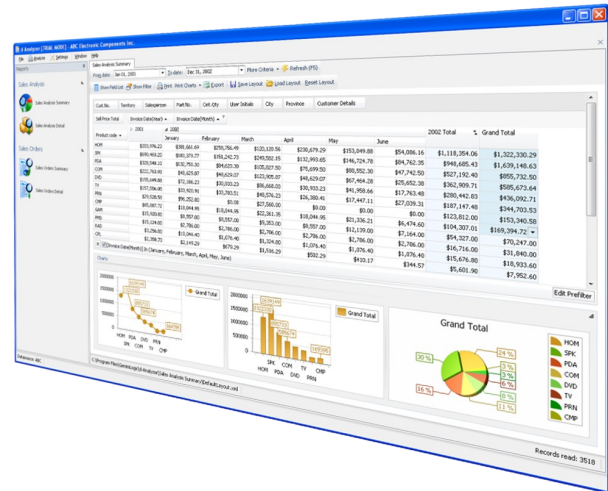

Expertly designed, d-Analyzer is a report writer and custom analytical tool that provides you with extraordinary insight into your business. By analyzing your data like never before, you'll make intelligent, timely decisions that will position your organization for greater competitive advantage.

Timely Decision-Making

Key to any business success is the ability to react quickly to changing economic factors. With d-Analyzer, you can easily generate new, powerful and timely reports in seconds, and perform instant "what about, what if" analysis to aid and support your decision making efforts. Try out different scenarios, and easily identify errors and anomalies to effectively correct any problem areas.

Effective Growth and Trend Analysis

Untap hidden potential and drive new revenue by easily identifying growth areas and previously unknown trends, then drill-down further to understand and maximize these opportunities. Recognize seasonal trends for products and locations, identify your busiest days, your top selling products, and best salespeople, learn the impact of currency fluctuations and effectively monitor your advertising and marketing efforts. Truly innovative, d-Analyzer takes analysis to the next level.

Affordable, Flexible and Easy-to-Use

Intuitive and easy to use, d-Analyzer requires no programming or technical knowledge. Pre-loaded templates can be adapted to your specifications or you can create your own reusable custom criteria and design templates. Dynamically change reports on-the-fly without creating or running new reports. Take advantage of unlimited grouping and filtering capabilities to produce powerful dynamic cross-tab, pivot and graph reports. Perform comparative analyses by day, week, month, year or by fiscal or calendar period.

Information Sharing

Using d-Analyzer as the conduit, information can be transferred to many formats, including Excel, PDF, XLS. d-Analyzer can email any of these formats with a few simple clicks.
